

Aspect Capital has operated Payroll Giving since 2001, but by 2008 uptakes had dropped.

We re-launched our scheme in November 2009 and this was a huge success. Our overall **uptake has risen to 43%**. This was worth an additional £15,294 to 42 different charities, with many of our staff giving to multiple charities.

Our average monthly gift per employee was **£43.95 per month**, which we think is impressive compared to the national average.

Aspect CEO, Anthony Todd said *"We are delighted to have been recognised with this nomination. We have promoted Workplace Giving within Aspect for many years, as we believe it to be the easiest and most effective way for our employees to support charitable work. We hope to continue our relationship with Workplace Giving UK for many years to come"*.
